Keyword use in document title

Essential

The document title is the text within the <title>...</title> tags in the HTML code of your web page. This chapter tries to find out how to use the search term "Bicycle routes" in the document title and if it's important for Google.com.

Example: <title>Your web page title</title>

Their contents

Rank	Keyword use in document title
1	Bike Trails, Paths & Routes From Over 40 Countries at Bikely.com
2	Cycling routes :: Bike For All >> The essential resource for everyone who cycles... or is thinking about it.
3	Journey planning (online wayfinders) :: Bike For All >> The essential resource for everyone who cycles... or is thinking about it.

Global link popularity of web site

Essential

The global link popularity measures how many web pages link to your site. The number of web pages linking to your site is not as important as the quality of the web pages that link to your site.

All major search engines take the quality and the context of the links into account. Search engines assume that your web page must offer relevant content if many quality sites link to it.

Number of inbound links according to these search engines (the more the better)

	Alexa	AllTheWeb (preset settings)	Google.com	Live.com	Yahoo.com
To Your Site:	19	14	1	0	16
To Site 1:	645	76,800	987	9,460	223,126
To Site 2:	181	2,110	8	11	1,933
To Site 3:	181	2,140	9	4	1,948
To Site 4:	736	104	15	34	95
To Site 5:	48	1,640	93	343	1,521
To Site 6:	459	989	7	40	2,459
To Site 7:	459	22,400	967	9,620	47,014
To Site 8:	15	606	31	120	561
To Site 9:	6	250	8	60	253
To Site 10:	108	1,530	75	488	2,135
Range:	6 to 736	104 to 76,800	7 to 987	4 to 9,620	95 to 223,126

Advice for the global link popularity

Summing up all analyzed search engines, there are too few web pages that link to your web site "www.seoskiturizam-dunav-fruskagora.com/en/index.htm". You should increase the number of web pages from different domains that link to your web site. <<

Google found less web pages that link to your web page than to the top ranked pages. Try to increase the number of web pages from different domains that link to your site. <<

Link texts of inbound links

Essential

Inbound links are links from other web sites to your site. If many other sites link to your site, then search engines consider your site to be important. However, the number of links is not as important as is the relevance of the linking page and the link text used in linking to your site.

This chapter lists a sample of the web pages that link to your site, along with the link text. Note that search engines do not reveal all inbound links to your site.

Sample of the web pages that link to your site

Linked Text	Linked URL	Web Page That Links To Your Site
[empty]	http://www.seoskiturizam-dunav-fruskagora.com	http://www.seo-websitepromotion.com/resources.php
Bicycle routes and adventure down Danube and Fruska Gora mountain	http://www.seoskiturizam-dunav-fruskagora.com/en	http://www.seo-websitepromotion.com/hotels_traveling_resources.php

Village country mansion near Danube on Fruska Gora Mountain	http://www.seoskiturizam-dunav-fruskagora.com/en	http://www.vekolts.com/links.htm
Village country tourism	http://www.seoskiturizam-dunav-fruskagora.com/en	http://www.seo-websitepromotion.com/resources.php

Advice for the link texts of inbound links

To get a high ranking on Google.com, make sure that the web pages that link to your site use the search term "Bicycle routes" in their link texts. The more links to your web site contain "Bicycle routes" (or a part of it) in the link text, the more likely it is that your web site will get a high ranking on Google.com for that search term.

It is advisable to use different but related keywords for the link texts. If all links to your web site use exactly the same link text, then Google.com might lower your rankings because of unnatural linking patterns.

Advice for the link texts of inbound links

In addition, the quality and reputation of the web pages that link to your site is very important to the search engines.

At least 10% of the analyzed inbound link texts contain the search term "Bicycle routes". This is good.

OK

Less than 20% of the analyzed inbound link texts contain the search term "Bicycle routes". You must increase the number of inbound link texts that contain that search term.

<<

Less than 40% of the analyzed inbound link texts contain the search term "Bicycle routes". You must increase the number of inbound link texts that contain that search term.

<<

Less than 60% of the analyzed inbound link texts contain the search term "Bicycle routes". You must increase the number of inbound link texts that contain that search term.

<<

Less than 80% of the analyzed inbound link texts contain the search term "Bicycle routes". You must increase the number of inbound link texts that contain that search term.

<<

Keyword use in body text

Essential

The body text is the text on your web page that can be seen by people in their web browsers. It does not include HTML commands, comments, etc. The more visible text there is on a web page, the more a search engine can index. The calculations include spaces and punctuation marks.

Keyword density:	0% to 6%	1%	OK	OK

Age of web site

Very Important

Spam sites often come and go quickly. For this reason, search engines tend to trust a web site that has been around for a long time over one that is brand new. The age of the domain is seen as a sign of trustworthiness because it cannot be faked. The data is provided by Alexa.com (or Archive.org if Alexa.com does not have data about a site).

Dates of the domain registration or of the first contents

	URL	Registration Date
Your Site	http://www.seoskiturizam-dunav-fruskagora.com/en/index.htm	Friday, October 20, 2006
1	http://www.bikely.com/	Monday, May 22, 2006 (newest domain)
2	http://www.bikeforall.net/linkcat.php?cid=75	Thursday, February 26, 2004
3	http://www.bikeforall.net/linkcat.php?cid=153	Thursday, February 26, 2004
4	http://vancouver.ca/engsvcs/transport/cycling/routes.htm	Monday, August 18, 2003

7	http://www.adventurecycling.org/	Thursday, December 23, 1999
8	http://www.seacoastbikes.org/	Wednesday, December 04, 2002
9	http://www.ontheroute.com/	Tuesday, August 31, 1999
10	http://www.pedaling.com/	Monday, August 23, 1999 (oldest domain)
Range	Monday, August 23, 1999 to Monday, May 22, 2006	

Advice for the web site age

The older your web site, the better it is for your rankings on Google.com. Your web site appears to be not very old so you must compensate by improving other search engine ranking factors.

<<

Keyword use in H1 headline texts

Very Important

H1 headline texts are the texts that are written between the <h1>...</h1> tags in the HTML code of a web page. Some search engines give extra relevance to search terms that appear in the headline texts. This chapter examines if this applies to Google.com, too.

Example: <h1>your very big headline text</h1>

Your contents

No.	H1 Heading Text
1.	Village country accommodation - 25 beds
2.	
3.	ECO ETHNO CLUB :: Location Cerevic BECOME OUR MEMBER...!!!

Advice for your H1 headline texts

Search term: "Bicycle routes"

	Competitors	Your Site	Advice	
Number of keywords:	all 0	0	OK	OK
Keyword density:	all 0%	0%	OK	OK

Keyword density:	0% to 25%	0%	You could increase the keyword density for the keywords	<

Advice for your H1 headline texts

Search term: "Bicycle routes"

"Bicycle" or "routes" but this is optional.

Keyword use in page URL

Important

The page URL is the part after the domain name in the web page address. This chapter tries to find out if Google.com gives extra relevance to search terms within the page URL. Separate your search terms in the page URL with slashes, dashes or underscores.

Example: "keyword/another-keyword.htm" is the page URL of
<http://www.domain.com/keyword/another-keyword.htm>

Their contents

Rank	Words In Page URL	URL
1	[no words]	http://www.bikely.com/

Server speed

Important

Popular web sites often have faster server response times compared to smaller unimportant sites. In addition, most search engines index more pages from fast web sites. This chapter shows you how long it takes on average for web pages on the top ranked sites to load. The data is based on the average server speed of the last 30 days and is provided by Alexa.com ("n/a" means that Alexa.com does not have data about your server speed).

Server speed results

Average Page Load Time (measured in seconds, the lower the better)

Your Site	1	2	3	4	5	6	7	8	9	10	Range
n/a	1.84s	4.98s	4.98s	1.13s	n/a	2.00s	2.00s	n/a	n/a	2.26s	1.13s to 4.98s

Server Speed Relative To Other Servers On The Internet (the faster the better)

Your Site	1	2	3	4	5	6	7	8	9	10	Range
n/a	fast: top 40%	very slow: bottom 15%	very slow: bottom 15%	fast: top 30%	n/a	average: top 45%	average: top 45%	n/a	n/a	slow: bottom 35%	very slow: bottom 15% to fast: top 30%

Advice for the server speed

The speed of your web site could not be determined. In general, the faster your web site, the better it could be for your rankings on Google.com. If you have a slow web site, you should contact or even switch your web hosting provider.

Keyword use in IMG ALT attributes

Important

The attribute defines an alternative text for an image when the user uses a text browser or when the user has turned off the display of images in the web browser application. Microsoft's Internet Explorer displays the alternative text if the user puts the cursor over the graphic. This chapter tries to find out if it makes sense to include the search term in the attributes to improve your rankings.

Example:

Your contents

No.	Image Alt Attribute Text	Image File Name
1.	deutsch	../images/ger.gif
2.	serbian	../images/srp.gif

Keyword use in bold body text

Important

The body text is the text on your web page that can be seen by people in their web browsers. The bold body text uses a darker and heavier face than the regular type face. It appears between `...` or `...` tags in the HTML source of your web page. CSS is not recognized. The statistics include spaces and punctuation marks.

Number of keywords:	0 to 5	1	OK	OK
Keyword density:	0% to 3%	8%	The keyword density for the keywords "Bicycle" or "routes" is too high. It should be 3% at maximum. Consider adding more text to lower the keyword density for these words.	<<

Keyword use in same site link texts

Moderately Important

Link texts are words and sentences that are used as links. Same site link texts are the link texts of the links that point to a web page on the same domain. This chapter examines if Google.com takes search terms in same site link texts into account.

Example: The HTML tag `Contact information` contains the same site link text "Contact information".

Your contents

Keyword use in outbound link texts

Moderately Important

Link texts are words and sentences that are used as links. Outbound link texts are the texts within the <a>... tags when the <a> tag links to a web page on a different domain. This chapter examines if Google.com gives relevance to search terms in outbound link texts.

Example: The HTML tag About the company contains the outbound link text "About the company".

Keyword use in meta description

Moderately Important

The Meta Description tag allows you to describe your web page. This chapter tries to find out if Google.com takes the Meta Description tag into account. Some search engines display the text to the user in the search results.

Example: <meta name="description" content="This sentence describes the contents of your web site.">

Even if the Meta Description tag might not be important for ranking purposes, you should use the Meta Description tag to make sure that your web site is displayed with an attractive description in the search results.

HTML validation of web page to W3C standards

Slightly Important

Web pages are written in special languages called HTML and CSS. Like any language, HTML and CSS change constantly. The World Wide Web Consortium (W3C) is the governing body that establishes what is valid HTML/CSS and what is not. Search engines obey the HTML/CSS standard. If there are errors in the HTML/CSS code of your web page, then search engines might not be able to read everything of your web page.

Validation results

	Validity
HTML:	3 errors, not valid http://validator.w3.org/check?uri=http://www.seoskiturizam-dunav-fruskagora.com/en/index.htm
CSS:	no errors, valid http://jigsaw.w3.org/css-validator/validator?uri=http://www.seoskiturizam-dunav-fruskagora.com/en/index.htm

Advice regarding the validity of your web site

The HTML validation of your web page www.seoskiturizam-dunav-fruskagora.com/en/index.htm failed. This means that Google.com might not be able to read your web page. You should fix any HTML errors.

Keyword use in meta keywords

Slightly Important

The Meta Keywords tag allows you to define which search terms are important to your web page according to your opinion. It should be placed between the <head>...</head> tags in the HTML code of your web page. This chapter tries to find out if Google.com gives relevance to search terms in the Meta Keywords tag.

Example: <meta name="keywords" content="keyword, another keyword">

Keyword use in the first sentence of the body text

Slightly Important

The first sentence of the body text is the first sentence after the <body> tag in the HTML code of your web page. Some search engines give more relevance to search terms when they appear in the first sentence. Some will use your first sentence as the description of your page on the search result page.

Example: <body>Here goes the first sentence. This text is not the first sentence.

Search engine compatibility

This chapter examines the general search engine compatibility of your web page.

Advice

Search engines need text to index your web pages, to determine the theme of your web site and to produce a site summary. They cannot read what is written on your graphical images or in a Flash movie. Google recommends to create a useful, information-rich site. Fresh, continuously updated content is one of the best ways to ensure that search engines return to your web site (and your visitors, too). Your web page "www.seoskiturizam-dunav-fruskagora.com/en/index.htm" contains only 184 words. It is strongly recommended to add more text to your web page.	<<
Some search engines penalize web sites if the search terms of the Meta Keywords tag don't appear in the body text of the web page. All search terms of your Meta Keywords tag appear in the body text of your web page so there will not be any problems with the search engines in this aspect.	OK
Your web page doesn't use the Meta Refresh tag so there won't be any problems with the search engines in this aspect.	OK
Your web page doesn't use the Meta Robots tag so there won't be any problems with the search engines in this aspect.	OK
Your web page doesn't use the Meta Title tag so there won't be any problems with the search engines in this aspect.	OK
Your web page doesn't use any Dublin Core meta tags so there won't be any problems with the search engines in this aspect.	OK
Your web page doesn't use any Meta tags twice so there won't be any problems with the search engines in this aspect.	OK
Your web page doesn't use the <title> tag twice so there won't be any problems with search engines in this aspect.	OK
Some search engines and directories don't accept submissions with capitalized letters in the document title or in the meta tags. Your web page doesn't use all capitalized letters in those web page elements so there won't be any problems with the search engines in this aspect.	OK
Your web page uses script code in an external file so you've already minimized the problems with scripts and the search engines.	OK
Your web page uses style sheet code in an external file so you've already minimized the problems with style sheets and the search engines.	OK
Your web page doesn't use frames so there won't be any problems with the search engines in this aspect.	OK
Some search engines consider tiny text (i.e. font size 1) as an attempt to fool the search engines. Some webmasters have abused tiny text in the past to hide dozens of keywords on a web page that human web surfers cannot see. Your web page doesn't seem to use tiny text so there shouldn't be any problems with the search engines in this aspect.	OK
Your web page URL "www.seoskiturizam-dunav-fruskagora.com/en/index.htm" doesn't indicate a dynamically served web page so there shouldn't be any problems with the search engines in this aspect.	OK

Advice

Your web page URL "www.seoskiturizam-dunav-fruskagora.com/en/index.htm" doesn't contain any of the special characters "&", "\$", "%", "?" or "=" in it so there shouldn't be any problems with the search engines in this aspect.

OK

Some search engines and directories rank web sites lower that are hosted at free web space providers, or if web sites don't have their own domain name. Some search engines also limit the number of web pages they'll index from a single domain. Your web site doesn't seem to be hosted at a free web space provider. If it does, consider getting your own domain name.

OK

Factors that could prevent your top ranking

Some ranking factors cannot be measured because the search engines do not reveal the necessary data, or it would be extremely time-consuming to measure the data. Make sure you pay attention to the following factors because they could prevent a top ranking for www.seoskiturizam-dunav-fruskagora.com/en/index.htm on Google.com.

Advice

Inbound links to your web page

Are the web pages linking to your web page relevant to the search term "Bicycle routes"?

How fast does your web page get new links pointing to it?

Do the web sites which link to your page belong to the same content category?

Since when do the links to your page exist?

Is the text surrounding the link to your page relevant to the search term "Bicycle routes"?

Your web page

How many important links from your other pages point to your web page?

Do the links on your web page point to high quality, topically-related pages?

How often and how many changes do you make to your web page over time? Is your content up-to-date?

How often and how many web pages do you add to your web site?

How long do your visitors spend time on your web page?

Search engine result page

Do your competitors on the search engine result page get a manual ranking boost by Google.com, for example Amazon or Wikipedia?

How many visitors of the search engine result pages click through to your page?

How often do search engine visitors search for your company name or web page URL on Google.com?

Negative ranking factors (you should be able to say "no" to all the following questions)

Is your content very similar or a duplicate of existing content?

Is your server often down when search engine crawlers try to access it?

Do you link to web sites that do not deserve a link?

Do you use the same title or meta tags for many web pages?

Do you overuse the same keyword or key phrase?

Do you participate in link schemes?

Do you actively sell links on your web page?

Do a majority of your inbound links come from low quality or spam sites?

Does your web page have any spelling or grammar mistakes?

Table: Ranking factors digest

This chapter shows some of the search engine ranking factors in tabular form. Some of the values may have been abbreviated by using "k" which means that the value must be multiplied by 1000. ("n/a" means "data not available".)

Digest												
	Your Site	1	2	3	4	5	6	7	8	9	10	Range
Number of inbound links according to these search engines (the more the better)												
Alexa:	19	645	181	181	736	48	459	459	15	6	108	6 to 736
AllTheWeb (preset settings):	14	77k	2k	2k	104	2k	989	22k	606	250	2k	104 to 77k
Google.com :	1	987	8	9	15	93	7	967	31	8	75	7 to 987
Live.com:	0	9k	11	4	34	343	40	10k	120	60	488	4 to 10k
Yahoo.com:	16	223k	2k	2k	95	2k	2k	47k	561	253	2k	95 to 223k
Links from social networks (the more the better)												
Del.icio.us:	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a
Digg:	0	20	1	1	1	2	2	2	0	0	0	0 to 20
Other ranking factors results (the older or the lower the better)												
Web Site Age:	Oct 2006	May 2006	Feb 2004	Feb 2004	Aug 2003	Jul 2002	Dec 1999	Dec 1999	Dec 2002	Aug 1999	Aug 1999	Aug 1999 to May 2006
Server Speed:	n/a	1.84s	4.98s	4.98s	1.13s	n/a	2.00s	2.00s	n/a	n/a	2.26s	1.13s to 4.98s
Alexa Traffic Rank:	7,181k	82k	576k	576k	80k	2,376k	234k	234k	11,186k	5,406k	1,558k	80k to 11,186k
